Contents of Volume 5

Volume 5 Number 1

Editorial

Growth factors in the pituitary gland **1**
George Kontogeorgos, Kalman Kovacs, and Bernd W. Scheithauer

Review

Hyperplastic proliferations of enteroendocrine cells **4**
Yogeshwar Dayal

Original Articles

Localization of basic fibroblast growth factor (bFGF) protein and mRNA in human pituitaries: Regulation of bFGF mRNA by gonadotropin-releasing hormone **27**
Long Jin, William F. Chandler, and Ricardo V. Lloyd

Occurrence and significance of vascular invasion in multinodular adenomatous goiter **35**
M. Papotti, E. Fara, C. Ardeleanu, and G. Bussolati

Immunohistological localization of TGFα, EGF, IGF-I, and TGFβ in the normal human pituitary gland **40**
Ping Ren, Bernd W. Scheithauer, and Jaroslava Halper

Dyshormonogenetic goiter: A morphological and immunohistochemical study **49**
Patricia S. Matos, Hélio Bisi, and Geraldo Medeiros-Neto

Pineal gland metastases from mammary carcinoma **59**
Norber A. Kerenyi, Elizabeth Pandula, and George M. Feuer

Case Reports

Proopiomelanocortin mRNA expression by small cell bladder carcinoma associated with Cushing's Syndrome: Diagnostic contribution of *in situ* hybridization **66**
Elli Lakka-Papadodima, Yvonne Dimoula, George Kontogeorgos, Zissoula Manika, John Kiayias, and Haralambos Theodorou

Dystopic Neurohypophysis **72**
Faruk Aydin and Nitya R. Ghatak

Volume 5 Number 2

Editorial

The first four years of Endocrine Pathology **79**
Kalman Kovacs and Sylvia L. Asa

Review

Functional pathology of human ovarian steroidogenesis: Normal cycling ovary and steroid-producing neoplasms **81**
Hironobu Sasano

Original Articles

Incidental adenomas of the human pituitary gland **90**
Yoshio Uei, Masaki Kanzaki, and Tadashi Yabana

Carbonic anhydrases in the human adrenal gland and its disorders: Immunohistochemical and biochemical studies of the enzymes **100**
Hironobu Sasano, Katsuaki Kato, Hiroshi Nagura, Seppo Parkkila, Anna-Kaisa Parkkila, Hannu Rajaniemi, and Naonori Sugai

Cyyokeratin distribution and functional properties of growth hormone-producing pituitary adenomas **107**
Toshiaki Sano, Shozo Yamada, Takashi Hirose, and Kazuo Hizawa

Metallothionein expression in normal, hyperplastic, and neoplastic thyroid follicular and parafollicular C cells using monoclonal antimetallothionein antibody E9 **114**
Kurt W. Schmid, Mike Greeff, Anton Hittmair, Martin Tötsch, Dietmar Öfner, Barbara Dockhorn-Dworniczak, Werner Böcker, and Bharat Jasani

Case Reports

Cushing's Syndrome caused by an ectopic pituitary adenoma of the sphenoid sinus: Adrenal crisis after partial resections of the adenoma **123**
Hiroyuki Morita, Keigo Yasuda, Kazuya Nakashima, Nobuyasu Noritake, Masanori Murayama, Kuniyasu Shimokawa, Noriyoshi Yamakita, Toshiaki Sano, Nobuaki Sasano, and Kiyoshi Miura

Carotid body tumor mimicking adenocarcinoma on fine-needle aspiration **131**
Mark A. Soares, Robyn L. Apel, and Yvan C. Bédard

Volume 5 Number 3

Review

Ovarian tumors with functioning manifestations **137**
Fattaneh A. Tavassoli

Original Articles

Rathke's pouch during autoimmune inflammation of the rat pituitary **149**
Seymour Levine and Arthur Saltzman

Utility of frozen section analysis on follicular lesions of the thyroid **154**
Mary P. Bronner, Ralph Hamilton, and Virginia A. LiVolsi

Hormone production and c-*myc* protein labeling in plurihormonal pituitary adenomas **162**
Hidetoshi Ikeda, Takashi Yoshimoto, and David W. Yandell

Thyroid lymphomas in human thyroid tissue with autoimmune thyroid disease xenografted in severe combined immunodeficient mice **169**
Tetsuya Morita, Norio Yoshikawa, Fumito Akasu, Sylvia L. Asa, Naomi Miller, Erika Resetkova, Guillermo Arreaza, Toshio Mukuta, Christopher Jamieson, and Robert Volpé

DNA ploidy of pheochromocytoma on cytology specimen by image analysis **178**
Norika Kimura, Mika Watanabe, Tsuneo Ookuma, Wakado Miura, Takao Noshiro, Yukio Miura, and Hiroshi Nagura

Amyloid deposits of the pituitary in old age: Correlation with histopathological alterations **183**
Christoph Röcken and Wolfgang Saeger

Case Report

Ectopic Cushing's syndrome caused by an 8 mm lung carcinoid localized by scintigram with the somatostatin analog ^{111}in-pentetreotide **191**
João Filipe Raposo, Maria João Bugalho, Luís Gonçalves Sobrinho, Maria Conceição Pereira, José Boavida, Margarida Loureiro, Maria Rosário Vieira, José Duro da Costa, José Manuel Mendes Almeida, and Kalman Kovacs

Volume 5 Number 4

Editorial

Editorial announcement **197**
Sylvia L. Asa and Kalman Kovacs

Original Articles

DNA measurement, proliferation markers, and other factors in pituitary adenomas **198**
Angelika Krämer, Wolfgang Saeger, Gesche Tallen, and Dieter K. Lüdecke

Immunohistochemical demonstration of chromogranin A, chromogranin B, and secretoneurin in primary non-small—cell carcinomas of the lung **212**
Martin Tötsch, Birgit Kunk, Barbara Dockhorn-Dworniczak, Dietmar Öfner, Reiner Fischer-Colbrie, Gregor Mikuz, Werner Böcker, and Kurt Werner Schmid

Cytomegalovirus adrenalitis in Acquired Immunodeficiency Syndrome **218**
Brian Chiu, Jack Butany, Kalman Kovacs, and Zi Cheng

Ki-67 is an indicator of progression of neuroendocrine tumors **223**
Noriko Kimura, Wakako Miura, Takao Noshiro, Yukio Miura, Tsuneo Ookuma, and Hiroshi Nagura

The neurofibromatosis gene in human pituitary adenomas **229**
Lin Pei and Shlomo Melmed

Case Reports

Two patients with metastasis of cancer to other neoplasm: A thyroid carcinoma metastatic to a lung carcinoma and a gastric carcinoma metastatic to a thyroid adenoma **233**
Akitaka Nonomura, Yuji Mizukami, Junzo Shimizu, Yoh Watanabe, Ryoichi Kamimura, and Tsutomu Takashima

A composite somatotroph-corticotroph pituitary adenoma **240**
Robyn L. Apel, Robert J. Wilson, and Sylvia L. Asa
